## To Whom It May Concern

Shirdi Sai Baba Temple Society an eminent NGO, since its inception in 1988, is engaged in the service of humanity. It has taken rapid strides, reaching out to millions of people through its socio-economic uplift of the society across caste, creed, colour and religion through its various services such as providing free child education with incentives to the poor and down-trodden, activities directly linked to alleviation of poverty as skill development and placement, facilitating social well-being like mass marriages of girls from poor families and health care through a series of dispensaries.

We are highly pleased to learn that Dr. Raman Kakar's research-work has been recognized by international TB community, particularly so because Dr. Kakar has been closely associated with our charitable medical work in the past.

He provided Honorary services as visiting TB Specialist for about 5 years in our TB clinic meant for the poorest of the poor residing in the rural and slum belt, on the outskirts of the city of Faridabad. those found suffering from TB were provided free of cost diagnosis and medicines for complete TB treatment.

Dr Kakar has been very popular with the TB patients, their families as well as our own staff due to his compassion, politeness and helpfulness. Even otherwise, he is well known in the entire district for his total dedication and strong commitment towards TB eradication.

He ensured that each TB patient and his family members read one or more of his numerous books, which are unprecedented tools of TB awareness.

We strongly support his participation in world TB conference and wish him more global exposure, experience and recognition.

For SHIRDI SAI BABA TEMPLE SOCIETY
